

"Higher Places"

by John Welton

© 2005

**Hey you, over there, why you sitting in that chair
What's it's gonna take to get you to dance with me
See it happen with your fingers and toes
More and more as the feeling grows
Calling you out on the floor to dance with me
It don't matter if you think you've got two left feet
Even if you say you can't find the beat**

**Dancing is so much better when it's done together
Dancing is much more fun when there's more than one
Let the music take you to Higher Places
When you look around and all you see is smiling faces**

**Come now, one and all, don't be leaning up against that wall
Let your inhibitions fall and get yourself free
Free, like a bird in flight, flying high and you feel all right
We just might dance all night and get ourselves free
Seize the moment the rhythm will show you how
If you think about it, there's no better time than now**

**Dancing is so much better when it's done together
Dancing is much more fun when there's more than one
Let the music take you to Higher Places
When you look around and all you see is smiling faces**
